

You are improving/building the **Member 2 section** of an internship marketplace website called **Interns Store**.

Project Context

Interns Store is an Australian internship platform for university students, recent graduates, international students, and employers. The website is inspired by SEEK, Indeed, LinkedIn and student career platforms, but it must focus only on internships.

My section is responsible for:

1. Browse Internships / Listing Page
2. Internship Detail Page
3. Apply Flow
4. Company Profile Page

Use HTML, CSS, Bootstrap 5 and JavaScript. Use localStorage where needed. No backend is required.

The website must look professional, modern, responsive, clean, and suitable for a university business website demonstration.

Use existing branding if already present. Do not remove current pages or break navigation.

1. Browse Internships / Listing Page

Create a professional internship listing page similar to SEEK/Indeed.

Page Purpose

Students should be able to quickly find suitable internships using search, filters, categories, job cards, map view, and action buttons.

Top Section

Add a clear page heading:

“Browse Internships”

Subheading:

“Find internship opportunities across Australia based on your skills, location and career goals.”

Search Bar Area

Place the search section at the very top of the page because students come to this page mainly to search.

Include:

1. Keyword Search Input
Placeholder:
“Job title, company, skill or keyword”

Purpose:

Allows students to search by job title, company name, technology, skill or industry.

2. Location Search Input
Placeholder:
“City, state or remote”

Purpose:

Allows students to search internships by location such as Brisbane, Sydney, Melbourne, Perth, Adelaide, Gold Coast or Remote.

3. Search Button
Text:
“Search”

Button behaviour:

When clicked, filter internship cards based on keyword and location.

Do not open a new page.

Update results on the same page.

After search, show:

“Showing X internships”

4. Clear Filters Button
Text:
“Clear Filters”

Button behaviour:

Reset all filters and show all internships again.

Filters Section

Place filters on the left sidebar on desktop and as a collapsible filter panel on mobile.

Filters:

- Industry / Field
 - Cyber Security
 - Software Development
 - Cloud Computing

- Networking
 - Data Analytics
 - AI & Machine Learning
 - Business Analysis
 - UI/UX Design
 - IT Support
- Location
 - Brisbane
 - Sydney
 - Melbourne
 - Perth
 - Adelaide
 - Gold Coast
 - Remote
- Work Type
 - Remote
 - On-site
 - Hybrid
- Internship Type
 - Part-time
 - Full-time
- Payment Type
 - Paid
 - Unpaid
- Duration
 - 3 months
 - 6 months
 - 12 months
- Difficulty Level
 - Beginner Friendly
 - Intermediate
 - Advanced

Button:

“Apply Filters”

Behaviour:

Filter job cards and update result count.

Button:

“Reset Filters”

Behaviour:

Clear all filters.

Sort Option

Place above job cards on the right side.

Dropdown options:

- Most Relevant
- Newest
- Closing Soon
- Highest Match
- Paid Internships
- Closest Location

View Toggle

Add buttons above job results:

- List View
- Map View

List View:

Shows internship cards.

Map View:

Shows a Google Map section with location pins or static embedded map placeholders.

If full map functionality is difficult, use a responsive Google Maps embed with cards below it.

Internship Statistics Section

Place above the job listings.

Display:

- 500+ Active Internships
- 200+ Partner Companies
- 5,000+ Student Applications
- 90% Student Satisfaction

Use cards with icons.

Internship Category Buttons

Place below search bar.

Clickable category buttons:

- Cyber Security
- Cloud
- Software
- Networking

- AI
- Data
- Business
- UI/UX

When clicked, filter jobs by category.

Internship Card Design

Each internship card must contain:

- Company logo placeholder
- Job title
- Company name
- Verified Employer badge
- Location
- Work type
- Duration
- Paid/Unpaid
- Posted date
- Closing date
- Short description
- Skill tags
- Match score
- Status badges
- Action buttons

Example card layout:

Title:

Cyber Security Intern

Company:

SecureIT Group

Badges:

Verified Employer, New, Paid, Hybrid

Location:

Brisbane, QLD

Duration:

3 months

Match:

92% Match

Short description:

Assist the security team with monitoring alerts, reviewing logs, and learning incident response processes.

Skills:

Cyber Security, Linux, Networking, SIEM

Buttons:

- View Details
- Apply Now
- Save
- Like
- Share
- Compare

Internship Card Buttons and Behaviour

View Details Button

Position:

Main button inside each internship card.

Text:

“View Details”

Behaviour:

Open the Internship Detail Page for that selected job.

Can pass job ID using URL query string:

details.html?id=job001

Apply Now Button

Position:

Inside each internship card.

Text:

“Apply Now”

Behaviour:

Open Apply Flow for that job.

Can open:

apply.html?id=job001

Save Button

Position:

Top right or bottom of internship card.

Text before click:

“Save”

Text after click:

“Saved”

Behaviour:

Save job to localStorage under savedJobs.

Show toast/popup:

“Internship saved successfully.”

Add button in popup:

“View Saved Jobs”

Like Button

Position:

Near Save button.

Text before click:

“Like”

Text after click:

“Liked”

Behaviour:

Save job to localStorage under likedJobs.

Show toast:

“Added to liked jobs.”

Share Button

Position:

Beside Save/Like.

Text:

“Share”

Behaviour:

Open small modal with:

- Copy Link
- Facebook
- LinkedIn
- Email

Copy Link button should copy current page/job link or show success message:
“Link copied.”

Compare Button

Position:
Bottom of job card.

Text:
“Compare”

Behaviour:
Add selected job to comparison list.
Allow maximum 2 jobs.
When 2 jobs selected, show modal/table comparing:

- Title
- Company
- Location
- Duration
- Work Type
- Paid/Unpaid
- Match Score

Match Score Button/Badge

Position:
Top right of card.

Example:
“92% Match”

Behaviour:
When clicked, open modal:
“Why this match?”
Show reasons:

- Matches your selected field
- Suitable location
- Beginner friendly
- Skills match your profile

No real AI required. Hardcoded logic is fine.

15 Realistic Internship Listings

Create exactly 15 realistic internship objects in JavaScript.

Each job should include:

- id
- title
- company
- location
- category
- workType
- internshipType
- duration
- paidStatus
- stipend or pay
- postedDate
- closingDate
- matchScore
- difficulty
- description
- responsibilities
- requirements
- skills
- benefits
- companyId

Use these jobs:

1. Cyber Security Intern — SecureIT Group — Brisbane
2. SOC Analyst Intern — FutureSecure — Brisbane
3. Software Developer Intern — FinTech Innovations — Sydney
4. Cloud Computing Intern — CloudNet Australia — Melbourne
5. Network Engineering Intern — NetworkPro Systems — Brisbane
6. Data Analyst Intern — DataSphere Analytics — Sydney
7. AI & Machine Learning Intern — SmartAI Labs — Sydney
8. Business Analyst Intern — EduTech Australia — Melbourne
9. UI/UX Design Intern — Vision Digital — Gold Coast
10. IT Support Intern — GreenFuture Energy — Melbourne
11. Systems Administrator Intern — BlueOcean Logistics — Perth
12. Penetration Testing Intern — CyberShield Consulting — Brisbane
13. Web Development Intern — ByteWorks Australia — Brisbane
14. Database Intern — HealthTech Solutions — Adelaide
15. DevOps Intern — NextGen Robotics — Sydney

Make them look real but do not claim these are real companies.

2. Internship Detail Page

Page Purpose

When a student clicks “View Details”, they should see a full internship profile with all important information and clear action buttons.

Header Section

At the top, show:

- Job title
- Company logo
- Company name
- Verified Employer badge
- Location
- Work type
- Paid/Unpaid
- Duration
- Posted date
- Closing date
- Match score
- Apply Now button
- Save button
- Like button
- Share button

Sticky Sidebar

On desktop, add a right sidebar that stays visible while scrolling.

Sidebar content:

- Apply Now button
- Save Job button
- Like button
- Quick Facts box

Quick Facts box:

- Location
- Work type
- Duration
- Paid/Unpaid
- Start date
- Closing date
- Difficulty level
- Match score

Job Description Section

Include:

- About the role
- Responsibilities
- Requirements
- Skills required
- What you will learn
- Internship benefits

“What You Will Learn” Section

Place below responsibilities.

Example:

Title:

“What You Will Learn”

Cards or tags:

- Real workplace experience
- Professional communication
- Technical tools
- Team collaboration
- Problem solving

For cyber jobs:

- Linux
- Networking
- SIEM
- Incident response

For software jobs:

- JavaScript
- Git
- APIs
- Agile teamwork

Career Path Section

Add a small career roadmap.

Example for Cyber Security:

Cyber Security Intern → SOC Analyst → Security Engineer → Security Architect

For Data:

Data Analyst Intern → Junior Data Analyst → Business Intelligence Analyst → Data Scientist

Button:

“View Career Path”

Behaviour:

Open modal explaining possible career progression.

Application Deadline

Add urgency text:

“Applications close in 7 days”

or:

“Closing date: 30 June 2026”

Company Panel

Show company information:

- Company logo
- Company name
- Industry
- Location
- Company size
- Website placeholder
- View Company Profile button

Button:

“View Company Profile”

Behaviour:

Open `company.html?id=company001`

Similar Internships Section

At bottom of the page, show 3 related internships based on same category or location.

Each similar internship card should include:

- Title
- Company
- Location
- View Details button

Social Share Section

At bottom or near header.

Buttons:

- Share on LinkedIn
- Share on Facebook
- Copy Link

Behaviour:

Open modal or show copied confirmation.

3. Apply Flow

Page Purpose

The Apply Flow should make it easy for students to submit an internship application and track it in the dashboard.

Apply Page Header

Show:

“Apply for Cyber Security Intern”

Company name:
SecureIT Group

Location:
Brisbane

Application Progress Bar

At the top, show 3 steps:

Step 1: Profile
Step 2: Resume
Step 3: Submit

Use Bootstrap progress bar or stepper.

Application Form

Fields:

- Full Name
- Email
- Phone
- University
- Course / Degree
- Year Level
- LinkedIn URL
- Portfolio URL
- Resume Upload input
- Cover Note textarea
- Screening Question 1:
“Why are you interested in this internship?”
- Screening Question 2:
“What skills make you suitable for this role?”

Buttons

Back to Job Button

Position:

Top or bottom.

Text:

“Back to Job Details”

Behaviour:

Return to details page.

Save Draft Button

Position:

Bottom left.

Text:

“Save Draft”

Behaviour:

Save form data to localStorage.

Show message:

“Application draft saved.”

Submit Application Button

Position:

Bottom right.

Text:

“Submit Application”

Behaviour:

Validate required fields:

- Full Name
- Email
- Resume
- Cover Note or question response

If missing:

Show validation error:

“Please complete all required fields.”

If valid:

Save job to localStorage under appliedJobs.

Save application details.

Open success state/page.

Confirmation Screen

After submitting, show:

Title:

“Application Submitted Successfully”

Message:

“Your application for Cyber Security Intern at SecureIT Group has been submitted. You can track your application from your dashboard.”

Buttons:

- View Dashboard
- Browse More Internships

Application Tracker

When user submits, store status as:

“Applied”

Dashboard should later show:

Applied → Under Review → Interview → Offer

For demo, it can be static.

Suggested Internships After Apply

Below confirmation, show 3 related internships.

Title:

“Recommended internships for you”

4. Company Profile Page

Page Purpose

Students should be able to learn more about the employer before applying.

Company Header

Show:

- Company banner
- Logo
- Company name
- Verified Employer badge
- Industry
- Location
- Website link
- Follow Company button

Follow Company Button

Text before click:

“Follow Company”

Text after click:

“Following”

Behaviour:

Save company to localStorage under followedCompanies.

Show toast:

“You are now following SecureIT Group.”

Company Statistics

Show cards:

- 50+ Employees

- 3 Open Internships
- 2018 Founded
- 4.8 Student Rating

Use realistic demo values.

About Company

Add professional paragraph about the company.

Example:

“SecureIT Group is a Brisbane-based technology company focused on cyber security consulting, monitoring and digital risk management. The company supports students through structured internship programs, mentoring and real-world project experience.”

Why Work Here Section

Cards:

- Mentorship
- Hands-on Projects
- Flexible Work
- Career Growth
- Real Industry Experience

Technologies Used

Show tags:

- AWS
- Python
- JavaScript
- Linux
- Azure
- SIEM
- Power BI
- Figma

Use tags depending on company category.

Current Internship Openings

Show all internships from that company.

Each card:

- Job title
- Location

- Duration
- View Details button

Company Location Map

Embed Google Maps or use a map section.

For Brisbane companies, use Brisbane CBD.

Heading:

“Company Location”

Intern Testimonials

Add 2 demo testimonials:

Example:

“My internship helped me build real-world confidence and understand how professional teams work.”

— Former Intern

Example:

“The mentoring experience was very supportive and helped me prepare for graduate roles.”

— Student Intern

Extra UX Ideas to Add If Possible

Toast Notifications

Use Bootstrap Toast for:

- Job saved
- Job liked
- Application submitted
- Link copied
- Company followed
- Draft saved

Empty States

If dashboard has no saved jobs, show:

“No saved jobs yet. Start browsing internships and save roles you like.”

Button:
“Browse Internships”

Loading Animation

When clicking Search or Apply, briefly show loading spinner for 0.5 seconds.

Accessibility

Use:

- Clear labels
- Good contrast
- Button aria-labels
- Responsive layout
- Keyboard-friendly forms

Mobile Design

On mobile:

- Filter sidebar becomes collapsible
- Sticky Apply button becomes bottom fixed button
- Job cards stack vertically
- Search inputs stack vertically

Final Required Outcome

Build or improve the Member 2 website section so that it includes:

- Browse internships page
- Search bar
- Location search
- Filters
- Sort options
- 15 realistic internship listings
- Internship detail page
- Apply flow
- Save, like, share, compare buttons
- Company profile page
- Company profile buttons and map
- localStorage functionality
- Responsive design
- Professional SEEK/Indeed/LinkedIn-style UI

Every button should have a clear behaviour:

Button → Action → Page/Modal/Popup → Result saved or displayed.

Do not leave buttons inactive unless they are clearly marked as demo placeholders.
